---

## **PROFILE**

Keen, confident and enthusiastic individual with practical web development skills. Offering proven technical expertise in developing and hosting bespoke websites from scratch, as well as the ability to manage clients and designers. Experienced in working both independently and in a team, delivering websites and web apps in a pressurised, deadline-driven environment. Seeking to utilise skills in a front-end or JavaScript developer role with opportunities for ongoing personal and professional development.

## **KEY ACHIEVEMENTS**

- Development of isomorphic React website and component library
- React builds of ecommerce journeys, various widgets and third party integrations
- Build of Help Centre in Salesforce with custom Aura components
- Development of passenger In-Flight Entertainment and Crew Management Interactive interfaces using web based software on various tablet-based devices.
- Complete build of numerous static and CMS based sites and themes.
- E-commerce – Build of e-commerce sites, customizing the shopping cart software to improve email, login and checkout systems, including writing of custom gateway
- Responsive - Build of several fully responsive sites. E.G. tomhomewood.com
- Event, booking and membership - Creation of various community based websites to accommodate advanced event management, booking systems and membership focussed content. E.G. southover.org.uk
- Indexing and search - Customized search and taxonomy queries to make content easier to find in multiple ways. E.G. stuarttownend.co.uk
- Design and build - complete process of web creation, including concept, design and build. E.G. Queens Park Tennis Club (qptc.co.uk)

## **CORE SKILLS**

- Able to work independently or within a team, and with a high degree of initiative.
- Resourceful and a good problem solver, with excellent communication skills.
- A quick learner with an inquisitive mind; committed to pursuing personal progress.
- Meeting deadlines and targets in a busy environment.
- Highly organised and methodical with an eye for accuracy and detail.
- Planning and managing own time and efforts to ensure optimum effectiveness.
- Operating to high standards of quality and code documentation.
